

Daniele Gazzelloni

Senior Frontend Engineer — React, Vue, Typescript

Santa Cruz de Tenerife, Spain

dangz.dev@gmail.com

Senior Frontend Engineer with 13 years of experience in the JavaScript ecosystem, including 7 years focused on frontend development with **React**, **Vue** and **TypeScript**.

Product-driven, with strong UI/UX intuition and extensive experience owning complex, data-heavy frontend applications in fully remote teams. Experienced in mentoring, onboarding, code reviews and cross-functional collaboration, with a strong focus on engineering quality in fast-paced environments.

Education

Bachelor in Computer Engineering
University of Rome "La Sapienza" — 2012

Technical Writing & Content

Author of a personal tech blog covering frontend architecture, frameworks and scalable UI design.

<https://www.dangz.dev/>

Core Skills

Frontend

React, Vue 3, TypeScript, JavaScript, Nuxt.js, Next.js, HTML5, CSS3, Tailwind, SCSS

Architecture & State

Frontend Architecture, Design Systems, Redux Toolkit, Zustand, Jotai, Pinia, Vuex, TanStack Query

Data & APIs

REST, GraphQL, AgGrid, Highcharts, Feature Flags

Testing & Quality

Vitest, Jest, Testing Library, Playwright, Cypress, Sentry, Datadog

Tooling & Delivery

Vite, Webpack, Docker, GitHub Actions, CI/CD

Cloud Deployment

Vercel, Netlify, AWS

AI-Assisted Development

Claude Code, Cursor, GitHub Copilot · AI-assisted implementation, refactoring, testing and code review · Specification-driven development

Other

Node.js (*tooling and API integration*), CMS (*Prismic, Sanity, WordPress*), debugging and refactoring skills

Languages

English, Spanish, Italian

Senior Software Engineer (Frontend) — Cycloid (remote)

Jul 2026 - Dec 2026, 6 months

Claude Code, Vue 3, Nuxt 4, TypeScript, h3, Vitest, Pinia, Cypress, Playwright, REST + GraphQL, PostgreSQL, Drizzle ORM, TanStack Query

Rejoined Cycloid to support the engineering team during a key transition period, balancing work across the current platform and the development of its next-generation version.

Key contributions:

- Contributed end-to-end across Cycloid's products, spanning infrastructure, frontend and backend development, with a constant focus on technical quality, UI/UX and product decisions
- Supported the engineering team during a strategic transition between the legacy platform (v1) and the next-generation platform (v2)
- Prioritized and delivered critical work for the company's main enterprise customers, helping unblock the team and ensure continuity on the existing platform
- Contributed to the development of the new AI-assisted, specification-driven platform while bringing historical product knowledge and engineering context from the original codebase
- Provided senior frontend guidance on code quality, engineering best practices, product thinking and cross-team collaboration
- Helped the team balance short-term customer needs with the long-term evolution of the product

Independent Engineering & Technical Writing

Oct 2025 - present

- Built complex React/Next.js applications while deepening expertise in the modern React ecosystem, including Next.js App Router, headless CMS integrations and contemporary state/data-management patterns.
- Research and write about **frontend architecture, performance, framework evolution and scalable UI engineering** through my personal technical blog, <https://dangz.dev>
- Continuously develop expertise in frontend testing, performance optimization, developer experience and **AI-assisted software development**.

Senior Frontend Engineer — Granular Energy (remote)

Apr 2023 - Aug 2025, ~2.5 years

React, Vue 3 + Composition API, Nuxt 4, TypeScript, Pinia, Jotai, Vuex, Tailwind, Vuetify, TanStack Query, Zod, AgGrid, Storybook, Highcharts, Lokalise, Cypress, Jest, Testing Library, Prismic CMS

Granular Energy platform is a portfolio management tool that helps utilities and energy professionals to manage clean and green energy more effectively.

 **Featured Engineer:** Selected for a deep-dive interview on my architectural contributions on FE: [View Article](#)

Key contributions:

- Delivered end-to-end features across multiple applications (frontend architecture, testing, release, maintenance), especially visualization related (dashboards) and data-heavy tables
- Built and maintained the company's public website using modern frontend tools
- Set up frontend testing strategy and refactored (architected) its folder structure for scalability and maintainability
- Improved quality and developer experience through refactoring, test coverage and documentation enhancements
- Actively contributed to technical decisions, product discussions and team retros
- Onboarded and mentored new engineers, enabling faster ramp-ups

Senior Frontend Developer — Cycloid (remote)

Aug 2019 - Apr 2023, ~4 years

Vue 2, Vuex, Pinia, Nuxt, Vuetify, JavaScript, Storybook, Highcharts, Cypress, Jest

Cycloid provides a cloud-agnostic DevOps platform used by enterprise clients.

Key contributions:

- Planned, developed and maintained complex frontend features from concept to production
 - Improved design consistency and reliability through component-driven development (Storybook)
 - Participated in the recruitment process (interviews, technical evaluation)
 - Mentored newcomers and improved team onboarding processes
 - Promoted healthy engineering culture by identifying blockers and improving team communication
-

Full-Stack Developer — Saavu (remote)

Nov 2018 - Jul 2019, 8 months

Vue 2, Nuxt, Vuex, TypeScript, Svelte, Vuetify, Node.js, Express.js, Postgres, GraphQL, Cypress, Jest

Saavu built a platform for mass communication and digital advertising. For them I acted as full-stack developer, building core modules for their hybrid web/mobile modular app:

- Developed core modules for a hybrid web/mobile mass-communication platform
 - Worked closely in small cross-functional team, where code quality, performance and testing were crucial
 - Contributed to both frontend and backend logic
-

Full-Stack Developer — 33 Mile Radius (remote)

Dec 2015 - Oct 2018, ~3 years

Meteor.js, Node.js, Express.js, JavaScript, PHP, MongoDB, WordPress, Mobile Development

- Solo developer of *Aquirly*, a cross-platform reviews-generation web and mobile application
 - Delivered new features, maintained production systems and managed full lifecycle from frontend to backend
 - Built and maintained WordPress marketing websites
-

Earlier Roles (condensed)

2013 - 2015, 2 years

React, Angular, Node.js, Express.js, JavaScript, TypeScript, Oracle and Postgres SQL, MySQL, MongoDB, WordPress, PHP, RabbitMQ, C#, Unity 3D

Completed multiple freelance contracts, including:

- **React** frontend for a contract-management platform
- **Full-stack** contributions to a Mexican fintech startup
- **WordPress** and **custom frontend** work for clients in creative industries
- A **Microsoft Windows 3D educational video game** using Unity 3D engine
- **Node.js** backend development for an enterprise import/export portal
